

The Office Group

Shared office pioneer hydrates members with the Zip HydroTap

Location: London

Client: The Office Group

Sector: Commercial

Product: HydroTap All-in-One Classic

The brief

- An advanced drinking water solution to aid hydration and productivity.
- A mains-fed drinking water system that's as hassle-free and safe as possible.

The solution

One of the vital products making members return to The Office Group's shared workspaces time and time again is the HydroTap All-in-One Classic. Blending seamlessly with the design of their buildings, the taps are user-friendly and highly functional, allowing members to use them intuitively. To ensure they are always performing to the best of their ability, The Office Group has a HydroCare plan for each of their 27 offices.

The results

"What we like so much about the HydroTap is how user-friendly it is; members can use ours intuitively. Over the years we've had positive feedback about the taste and there would be uproar if they were out of use. Knowing we can always rely on Zip to provide sophisticated hydration to our members is why we choose them time and time again."

Piero Catania, Facilities Manager
